

Copper Hills Elementary School

7635 West 3715 South
Magna, Utah 84044-2399

Office: (385)646-4792

Dear Parents and Students,

Welcome to a new year! I am delighted to be your teacher this year. We are going to have a great year together. Remember, the first day of school is Monday, August 20. School begins at 8:10 a.m. Don't think about school yet, though. You still have plenty of vacation days left!

If you'd like to know more about your new teacher - that's me! - I invite you to go online to our class website at <http://deanadventures.com/schoolsite/school.htm>. Go there to find lots of information and resources. For those of you who don't have the Internet, this letter will provide you with the necessary information.

Students, I am very interested in getting to know you. I want to help you realize your potential so you can have the resources that will make your life enjoyable and comfortable. Education can give you the lifestyle you want and deserve.

You should know that I've been in education since 1981. I enjoy working with young people and work hard to make sure I do what is best for each of my students. In my classroom there are thirty four computers, student cameras, graphic writing tablets, a big screen projector, Interwrite boards, a document camera, microphones . . .well...lots of technology tools that we use to individualize student learning.

Please read through the attached *Class Plan* so that you are aware of how this year will run. After reading the information, **please sign and return the last page when you come on the 20th**. This way I will know that you know our plan.

We will provide all necessary materials this year, but we would appreciate it if you could bring a few extra pencils. Also, please do not purchase big binders or big pencil boxes at Back to School sales. There is just not enough room in the individual student bins for these. I will provide three notebooks for Math, Language, and Science notes and three folders – **Important Papers, Assignments, and Going Home** – for students to stay organized.

The first S.E.P. Conferences for this year will be Monday and Tuesday, September 24th and 25th. We'll be sending home more information about that soon. Thanks in advance for your support. I look forward to a successful year!

Sincerely,

Mrs. Vickie Dean, M.Ed.

Mrs. Dean's Class 2018-19

Classroom Plan

Attendance: Students are expected to come to school on time. At the end of the year and periodically throughout the year, students with zero tardies and/or perfect attendance will receive special awards. If a student must be gone for whatever reason, it is important that the parent send a signed note to school with the child upon his/her return to class.

Discipline: All students are expected to behave responsibly. No one is permitted to keep the class from learning. Hard work is a reward in itself, but coupons for the End-of-Term Sale, additional computer time, certificates, special privileges, treats, little prizes, short activities, notes and such will be given to encourage students to make good use of time. If a student chooses to act irresponsibly by disrupting class, not following school rules or by not working, the following will occur:

1st disruption or misbehavior: Student is given a warning.

2nd disruption or misbehavior: Student misses one recess and/or parent will be contacted.

Math: We at Copper Hills want students to value mathematics and capable of communicating and reasoning mathematically. We use an excellent math program called "Go Math" (thinkcentral.com). Students will have one sheet math homework every weeknight. Students may access their homework online in case they forget to take it home at night. The focus is on problem solving and practicing math reasoning. You may check out our class website for more information and resources. My UEN site is specifically designed for students to engage in interactive learning and study. Even if a child finishes homework in school, he/she should still engage in 20 minutes of math practice/problem solving each weeknight. See <http://my.uen.org/myuen/209847>. I will send home more instructions about Go Math soon.

Reading/Language: Students in my class are required to read thirty minutes every week night. Books are very important in my classroom. Each student must carry a reading book. Books may be checked out from my classroom library, the school library or town libraries.

Also, students are required to complete one-page book reports on each book that they complete. Book reports should tell the title, author and number of pages in the book. It should also tell about the plot, setting, characters and ending. These reports are to encourage students to read. Book reports must be signed by a parent. Four hundred pages of reading are required each term. Books read should be on the appropriate reading level.

L-E-A-R-N Monthly Calendars: On the first day of each new month, I will send home the new calendar where students will record important **homework** that will lead to academic excellence. Please post this calendar in a place where there is easy access and where it can be viewed often. First, on those days when you have completed at least 30 minutes of at-home reading, record an **R** on the date. Twenty **R**'s are required each month. Second, on those dates when 20 minutes of at-home math practice has been completed, record an **A**. The last three programs listed here **are not required**, but are **optional** and will help build excellence and self-esteem. Third, record an **E** on the monthly **LEARN Calendar** when there has been at least 20 minutes of aerobic exercise. This exercise must be after school and may be aerobic exercise of any type. Fourth, record an **N** on the date when nutrition has been optimal. This means eating fruits, vegetables, protein, whole grains, etc. and there has been very little junk food consumed. Finally, write an **L** on the date when something new has been learned. This can be something that was learned during, before or after school. We track our learning in

our computer LEARN file or in a notebook. Remember, only the after or before school reading and math are required.

There is no homework on weekends. The exercise, nutrition and learning parts of the *LEARN Calendar* are optional. You can remember the five parts for excellence using the *L-E-A-R-N* acronym:

L = Learn something new every day. Mark an **L** on the date on your calendar and record the thing you learned in your Learning notebook.

E = Exercise: Mark an **E** on the date when you exercised at least 20 minutes.

A = Arithmetic: Mark an **A** on the date when you did 20 minutes of math work.

R = Read: Mark an **R** on the date when you read at least 30 minutes.

N = Nutrition: Mark an **N** on the date when you ate nutritional foods and very little junk food.

Each monthly calendar must be signed by a parent. Students keep these calendars in their Important Papers folder until turning them in at the end of April. Special end of year awards will be given to those students who participate in this LEARN program.

Planners: We are providing each student with the **Copper Hills School Planner**. This agenda is designed to help students manage their time, make goals, and track assignments so that they can take an active part in controlling their academic achievement. Copper Hills Elementary requires all students to bring the agenda to school every day. I expect my students to record their assignments in these books. Each Monday morning we will write the week's events, schedule, activities and assignments into the planners. Monday evening, parents should read and sign the planner. Students turn their planners into me each Tuesday morning. I read any parent notes and initial next to the parent's signature. This method should help you be informed about assignments, tests, projects, school events, etc.

Grading and Assessments: You may access assignment information, scores, averages and grades any time by going to the district's online grading program at portal.graniteschools.org. The first time you go to the site, you will need to set up an account. When setting up the account, you will choose a username and password. You will use the name and password in the future in order to access important information. If you haven't Internet access, never fear because each morning I hand out a Missing Work report to each of my students who have assignments missing. Every student will always know just what work may be missing. Instructions for setting up a parent grade book account are on my website at <http://www.deanadventures.com/schoolsite/school.htm>.

Granite School District is going to a Proficiency Based Grading program which means that all assessments and assignments in the grade book will be connected to specific sixth grade concepts that should be mastered by the end of the year. Students will be awarded numbers and not grades. We will soon send home more information on this new grading program.

Free or Reduced Fee Lunch: Be aware that you should look for a packet of information to come home to you the first day of school. In this packet from Copper Hills Elementary, you will find an application for free or reduced fee lunch. We would encourage you to take advantage of this program if you qualify. All students in our school receive a free breakfast each morning.

Advanced Learners Programs: Copper Hills has an Advanced Learner committee made up of teachers, parents and administrators. Our committee feels strongly about supporting and meeting the needs of students who will become future leaders in our communities.

Since my class is the Advanced Learners' class, you should know a little about my experience with Advanced Learners. I have an endorsement in GT. Before coming to Copper Hills, I taught gifted/talented or advanced

learners classes throughout the year. I taught district summer classes to advanced students. I also taught teachers how to use technology tools to address the needs of the Advanced Learner. I have visited various schools in the Davis and Jordan districts to learn about their gifted programs. I have also written and been awarded various grants. I nominated gifted students to receive the state's most gifted student award, the Nicholas Greene Award. I have been honored to present this prestigious award to one of my students at the state's annual convention.

All students are gifted in their own way. I believe that my challenge is to individualize and differentiate instruction to help students identify and develop their skills, strengths and abilities so that they will have rewarding careers and happy, successful lives.

Here are some of the programs we will participate in this year:

Expeditionary Learning Project(s): This is a new program that our new principal, Ms. Rose, brought to us. We'll be doing STEM (Science, Technology, Engineering and Math) work in our new STEM lab.

Science Fair: Students use the scientific process to create a science fair project. This event occurs in January.

National Math Olympiads: Each monthly contest consists of five difficult problems. Every problem requires careful mathematical thinking and has a time limit. Each student, working alone, scores 1 point for each correct answer. A student may score up to 25 points per year. In addition, each week, students may engage in the Olympiad Practice Problems. There are five weekly problems. Parents may work with the students on these. It's a great way for everyone involved to strengthen problem solving and reasoning skills. Those students with the most practice points on the weekly Olympiad Practice Problems will receive a special award at the end of the year. Those scoring highest on the monthly National Olympiad tests will receive trophies at the end of year awards assembly.

MobyMax: This is an adaptive site where students work at their own individual levels in order to increase their skills. Students sometimes go to this site when they've free time.

Thunderbird Award: This is a rigorous but exciting new program that students in our school will participate in this year. You can get the details at my website: deanadventures.com/schoolsite/school.htm

IXL: This site allows students to work on specific math and language concepts. Tutorials and practice help students learn what they might have missed in past study.

Utah Compose: This district and state writing site helps students learn how to write well.

Thanks for reading all of this information! I am excited about this new year and look forward to working with you! See you soon!

Mrs. Dean

My child's name is _____. I have read the above information.

Parent Signature

Your comments are welcome:

Please return this page only. Keep the rest for reference, if you wish. Thanks!

Would you also include your email and/or telephone so I can stay in touch with email and/or texts?

Thanks!
